PERFORCE login and setup:

Please keep this email.
Here is some needed information, for Perforce server.

Step 1/7: Perforce documentation.

- Read this first - Introducing Perforce
    - https://www.perforce.com/perforce/doc.current/manuals/p4v/index.html
- Read and enjoy

Step 2/7: Follow the instructions in Getting Started (very important)

Step 3/7: Download and install Perforce Visual <u>Client</u> P4V for windows

- Download P4V Helix Visual Client
    - https://www.perforce.com/downloads/helix-visual-client-p4v
    - Download and install the appropriate version for your OS (32bit or 64bit)
- IP and Port of the server:
    - In the dialog box: ***140.192.39.61:1666***
        - IP: 140.192.39.61
        - PORT: 1666
- Follow the instructions from Getting Started on how to setup the P4V.
- Your Depot is called ***//schrank2017fall_gam369/***

Step 4/7: Custom Cheesy DePaul Videos:

- Links to cheesy video on how to use perforce
    - Configuring Perforce to Local Machine.mp4
    - Perforce Add Delete Files.mp4
    - Setting up P4V 2016.mp4

Step 5/7: Login and passwords:

- Here's a list of everyone's login
    - Campus connect ID is used
        - Your default password is "doggy" (lower case)
            - *or your* previous password if you had an active perforce account before
        - If you need to reset it send an email to ekeenan2@cdm.depaul.edu
- Change your default password now
    - Click <Connection> <Change Password>
        - ***Change your password***
- Update (fix) your user's data
    - Click <Connection>   <Edit Current User>
        - ***Reset your email to the correct one***
        - ***Update your full name***
- User names:
    - acruz40
    - choye
    - dcoday
    - eclaudio
    - jewing8
    - jkuo3

- o jmotton
- o jsulli46
- o lpeders2
- o mdo1
- o mgrenke
- o nsangsaw
- o sasmusse
- o wbuesing

Step 6/7: Setup
- After logging onto perforce and setting up a workspace
- Do the following modifications to make the perforce environment work better
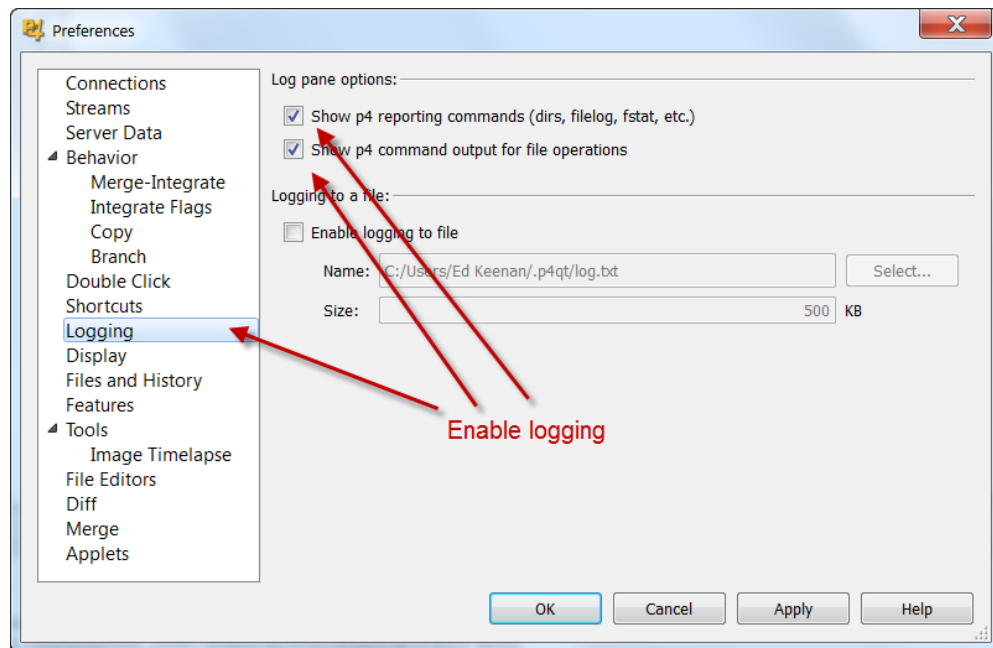

Perforce(1) - Modify your workspace please

Edit your workspace, go to the advanced tab
Especially the revert unchanged files

Perforce(2) - Enable logging

Go to Edit tab, choose preferences

Step 7/7: Read the perforce papers from the Perforce website (perforce.com).
→ *Seriously, please read them*

Enjoy.
